

My ACP Decisions: Quick Start Functionality

Product Update: An Easier way to Share Video Content

When time is of the essence, clinicians can now share our content more efficiently using My ACP Decisions Quick Start. **We have pre-made codes that enable users to access specific video content via a simple web link.** Providers can bypass logging into the My ACP Decisions platform, freeing up their time.

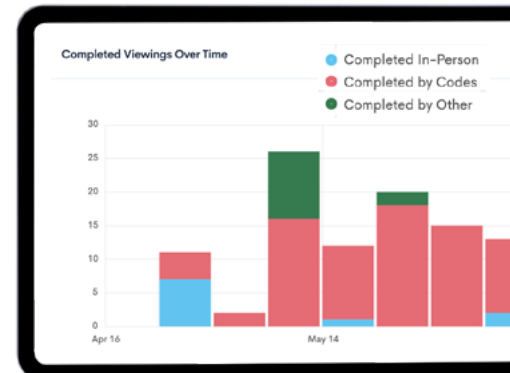

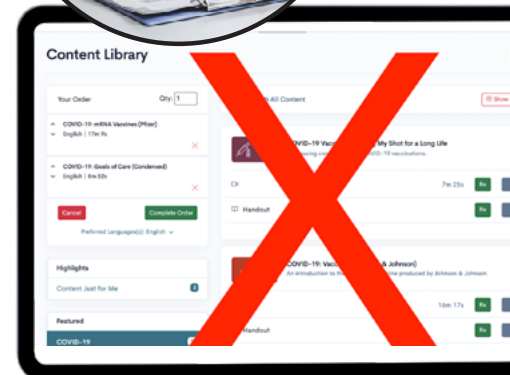

Bonus: these codes can be shared with multiple times.

How It Works

1. Receive pre-made code(s) from ACP Decisions (one code per video).
2. Visit www.mycode.today and enter the pre-made code(s) to access content at the point of care **or** share pre-made code(s) with the patient so that they can view it multiple times.

Content viewed using an ACP Decisions Quick Start code can be tracked in the **Reporting tab** of the My ACP Decisions platform and will appear as **“Completed by Other.”**

Of course, clinicians can still use the platform to prescribe video content and create custom codes to share with their patients.

About the ACP Decisions Video Library

- Providers have access to over 400 professionally-crafted video decision aids in over 23 languages with native speakers.
- Utilization of the video library is **evidence-based** with over 20 randomized, controlled trials involving 10,000+ patients.
- ACP Decisions’ videos are listed as a fundamental resource for patient education and engagement in the **National Quality Partners Playbook™: Shared Decision Making in Healthcare.**
- ACP Decisions’ end-of-life care patient decision aids are certified by Washington State Health Care Authority.
